

Powering Forward to a Low Carbon Future

As operator and developer of Ireland's electricity grid, we're leading the transition to a cleaner, low carbon future. A future where Ireland's world class potential in renewable energy is realised – supporting our energy security and our economy.

We have the expertise, ambition and commitment to make it happen. And we've already made significant progress. By 2020, nearly 40% of our electricity came from renewable sources. By 2030, we're aiming to have 80%.

Together, we must deliver the critical infrastructure that Ireland needs to bring about this energy transformation. For today, and for future generations.
